## February 1997 Newsletter

### The President's Column...

One of our primary goals in 1997 is to increase the benefits individual and sustaining members get out of being active participants and supporters of SAME.

Two easy benefits to take advantage of are exposure and networking. Attendance at meetings is a great way to meet people, exchange ideas, let members know what you and your organization are doing, and gain information which can help you do your job better or your company be more successful.

Another service available through the National Headquarters is Resume/Job Referral Service. This can work for members seeking employment or for firms looking for qualified new employees. Contact COL (Ret) Tim Wood, 703-549-3800, ext 60; FAX: 703-684-0231.

Upcoming programs will be actual training seminars. These can be extremely beneficial and great use of everyone's precious time. Please provide suggestions for topics to the Programs Committee Chairman, LTC Tom Frendak, 918-669-7201.

We need everyone's help and participation to make 1997 a great year for the Tulsa Post. I'll see you at

the February meeting. Bring a member who hasn't been attending or a friend who is interested in joining the Post.

ESSAYONS!

COL Sanford

### About Our February Speaker -Paul M. Rose, P. E.

Paul is a principal and part owner of Wallace Engineering, a 60-person structural and civil engineering firm with offices in Tulsa, Kansas City, and Irvine, California. He graduated with a Masters in Architectural Engineering from OSU, is registered as a Professional Engineer in four states, and has practiced structural engineering for 12 years.

Paul has worked on a variety of projects including mid-rise office buildings, industrial plants, manufacturing facilities, commercial buildings, and even the occasional residence. In recent years, his focus has been on investigative and repair services, especially concrete structures. He is a member of the International Concrete Repair Institute and American Concrete Institute Committee 546, Concrete Repair.

### Presentation Topic: *Mayo Garage Repair*

The presentation will cover the investigation, repair design, and construction of repairs on one of the oldest concrete garages in Tulsa, the Mayo Parking Garage. Damage included large spalled areas, corroded reinforcing and cracking. Repairs incorporated the use of hydro-demolition, portland cement concrete, methyl methacrylate, and waterproof membranes.

#### February Meeting Joint meeting with ASCE

Featured  
Speaker . . . Paul M. Rose, P. E.  
Wallace Engineering  
*"Mayo Garage Repair"*

Date . . . . Tuesday, February 18
